Data Protection by Design

CDHA has an obligation to implement technical and organisational measures to demonstrate that data protection has been considered and integrated into its processing activities.

When introducing any new type of processing, particularly using new technologies, it will take account of whether the processing is likely to result in a high risk to the rights and freedoms of individuals and consider the need for a Data Protection Impact Assessment (DPIA).

All new policies including the processing of personal data will be reviewed by the Data Protection Lead to ensure compliance with the law and establish if a DPIA is required. Advice and assistance will be provided by the DPO and if it is confirmed that a DPIA is required, it will be carried out in accordance with CDHA’s DPIA Procedure.

Training

All CDHA personnel will be made aware of good practice in data protection and where to find guidance and support for data protection issues. Adequate and role specific data protection training will be provided during induction and annually thereafter to everyone who has access to personal data to ensure they understand their responsibilities.

Breach of Policy

Any breaches of this policy may be dealt with in accordance with CDHA’s disciplinary procedures.
